

PRODUCT OVERVIEW · 2026

ForgeAI

Your workforce's AI brain — on the floor, in their hands.

ForgeAI turns your SOPs, manuals, training docs, and expert videos into a living knowledge base — so your frontline workers get instant, accurate answers from any phone, anywhere on the floor.

THE PROBLEM

Frontline workers are flying blind

Your SOPs, manuals, and decades of expert knowledge sit in binders, shared drives, and people's heads — inaccessible when it matters most.

**Knowledge is trapped in documents**

Hundreds of PDFs, binders, and Word docs that nobody can find — let alone search — on the shop floor.

**Every question costs time**

Workers stop what they're doing, find a supervisor, wait for an answer. Multiply by hundreds of questions per week.

**Expert knowledge walks out the door**

When your senior technician retires, years of tacit knowledge goes with them. There's no system to capture it.

**Generic AI can't be trusted**

ChatGPT doesn't know your machines, your parts, or your procedures. Workers can't rely on it for safety-critical answers.

23%

of work time spent searching for information
(IDC Research)

\$47B

lost annually to inefficient knowledge transfer in manufacturing

of manufacturing workforce turning over within 5 years

THE SOLUTION

Drop in your docs. Ask anything.

ForgeAI turns your existing documentation into a live, AI-powered knowledge base — grounded in your content, not the internet.

Answers that come straight from your documents

Every answer ForgeAI gives is sourced directly from the files you upload. Workers see exactly which document the answer came from — giving them, and you, full confidence and a clear paper trail.

You upload your docs

AI reads & organizes everything

Worker asks a question

Most relevant content found instantly

AI answers with source reference

Upload Any Document

PDFs, Word docs, images, audio clips, training videos — ForgeAI reads them all and makes them instantly searchable. No manual tagging, no reformatting.

Expert Capture

Record a senior employee doing their job. ForgeAI watches and listens to the video, then automatically writes up the steps, safety notes, and Q&As — preserving their expertise forever.

Instant AI Answers

Workers type or speak their question and get a clear answer in seconds — with a link to the exact source document. No more hunting through binders or waiting for a supervisor.

Manager Dashboard

Managers upload documents, invite workers, and see the status of everything in one clean view. Workers only see the chat — no clutter, no confusion.

MOBILE — WORKS EVERYWHERE

On the floor, in their hands.

ForgeAI works on any iPhone or Android phone — no IT team, no app store download required. Workers tap one icon on their home screen and they're in.

Works like an app. Installs like a website.

No download, no IT request, no new hardware — live today

✓ Installs on iPhone & Android

✓ Point camera, get answers

✓ Speak your question, hear the answer

✓ Works even with patchy signal

Smart glasses support — coming in Phase 3

Point & Ask

Worker points their phone camera at a machine, a part, or an error code and asks "what do I do?" — ForgeAI answers from your own manuals.

Speak Your Question

Tap the mic, ask out loud. ForgeAI converts speech to text and delivers an answer in seconds. Gloves on, hands busy — no problem.

Built for the Shop Floor

Spotty Wi-Fi won't crash the app. ForgeAI keeps working gracefully even when the connection drops, and picks back up automatically.

Path to Smart Glasses

✓ Phase 1 — Live

Mobile app on iPhones & Android phones

→ Phase 2 — Next

Pilot with 2–3 real customers, gather feedback

Phase 3

Dedicated app for industrial smart glasses (RealWear, Vuzix)

Phase 4

Live camera feed, full offline mode, hands-free voice commands

MARKET & DIFFERENTIATION

Built for the people who build things.

ForgeAI targets small and mid-size manufacturers and industrial operations — the businesses that can't afford six-figure enterprise software and six-month rollouts.

Who this is for

- ✓ Small & mid-size manufacturers (50–500 employees)
- ✓ Maintenance & repair teams
- ✓ Food & beverage processing plants
- ✓ Logistics and warehouse operations
- ✓ Any business with procedures, compliance requirements, and high staff turnover

Why ForgeAI wins

- ✓ Answers *your* documents — not come only random internet results from
- ✓ Expert Capture preserves a retiring worker's knowledge in hours, not months
- ✓ Runs on phones your workers already own — zero hardware spend
- ✓ Up and running the same day — no IT project, no training programme
- ✓ The AI is always accurate to your content, not guessing

What's built & what's next

Done

AI Knowledge Base + Expert Capture

Upload documents and videos — workers get instant, sourced answers via chat

Done

Mobile App (iPhone-first)

Point-and-ask camera, speak-your-question voice, home screen install

Next

First paying customers

Onboard 2–3 pilot businesses, gather real-world feedback

Future

Industrial Smart Glasses

Dedicated app for RealWear & Vuzix — fully hands-free on the floor

How access & security work

- ✓ **Managers** upload documents, invite workers, and review Expert Captures
- ✓ **Workers** only see the chat — a clean, focused mobile interface
- ✓ Each company's data is completely separate from every other
- ✓ Workers join via a simple email invite — no passwords to remember
- ✓ Secure login with role-based access built in from day one

READY TO SEE IT LIVE?

Put your SOPs to work.

ForgeAI is live and ready. Upload your documents and have workers asking questions today — no IT team, no lengthy rollout, no new hardware.

Minutes to set up

Upload docs, invite workers
— live in under an hour

Any device

Phones workers already
have. No hardware spend.

Your data only

Answers come from your
docs. Nothing else.
